

# Open Source Handhelds

Steve Maddison

14 April 2011

Competa Conference Center  
Rijswijk, The Netherlands

**Welcome,  
Handheld  
Fans!**

# Introduction

## What?

- NOT Sony PSP or Nintendo DS
- Devices designed with open development in mind (Pandora, Caanoo, etc.)

## Who?

- Retro computing/gaming nut
- User and developer of open source software
- Ported some stuff to Pandora
- Sr. UNIX Engineer at Competa

# Introduction

- **History**
- **ARM**
- **Operating Systems**
- **Software**
- **Packaging**
- **Development**
- **The Future**
- **Questions**

# History

# 2001

- Game Park (Korea)
- 133 MHz ARM920T
- 8 MB RAM
- 3.5" TFT 320x240
- SmartMedia storage

## Game Park GP32

# 2005

- GPH ≠ Game Park
- 200 MHz ARM920T  
200 MHz ARM940T
- 64 MB RAM
- 3.5" 320x240 touch screen
- SD card storage

## GPH GP2X

# 2009

- Dingoo Digital Technology Company Ltd. (China)
- 336 MHz MIPS
- 32 MB RAM
- 2.8" 320x240 LCD
- MiniSD storage

## Dingoo A320

# 2009

- GPH's second handheld
- 533 MHz ARM9  
3D Acceleration
- 64 MB RAM
- 2.8" 320x240 AMOLED
- SD/SDHC storage

## GP2X Wiz

- Open Pandora Team
- 600 MHz ARM Cortex-A8  
110 MHz PowerVR SGX 530  
430 MHz DSP
- 256 MB RAM
- 4.3" 800X480 touch screen
- Dual SD/SDHC storage
- Built-in WiFi & Bluetooth
- €330

**2010**  
(±2 months)

**Pandora**

# 2010

- Specs similar to GP2X Wiz
- 128 MB RAM
- Analogue stick
- Accelerometer
- 3.5" 320x240 LCD
- Optional WiFi (USB)
- €125

## GP2X Caanoo

# ARM

# 1981

Acorn BBC Micro  
6502 CPU

# 1981

## Acorn Business Computer (ABC) Project

- To compete with the IBM PC
- Required extra processors to complement the 6502
- New architecture required
- Berkeley RISC Project

- 1983-1985** Acorn RISC Machine: ARM1, ARM2
- 1990** Spin-off: Advanced RISC Machines Ltd.
- 1998** ARM Ltd. / ARM Holdings plc. floated
- 2005** 1.6 billion cores licensed
- 2008** 10 billion cores shipped

# 2011

**15,000,000,000 cores in the wild**

- 98% of all cell phones
- MP3 players
- Routers
- Hard drives
- Handheld consoles

## Why ARM?

RISC

```
graph TD; RISC --> SimpleDesign[Simple design]; SimpleDesign --> LowPower[Low power consumption]; LowPower --> LongBattery[Long battery life]; LowPower --> LowHeat[Low heat output];
```

Simple design

Low power consumption

Long battery life

Low heat output

## Why ARM?

FUN!

Smaller devices

Compact packages

Long battery life

Low heat output

# System on Chip (SoC)

Smaller devices

Compact packages

# System on Chip (SoC)

Microcontrollers on steroids!

CPU Cores

Flash Memory

Peripherals

# System on Chip (SoC)

What about RAM?

On-die  
RAM

Package-on-Package  
(BGA PoP)

# The Megahertz Myth

**500 MHz = 500 MHz**

# The Megahertz Myth

**500 MHz**

**500 MHz**

# **An Analogy...**

# Yet Another Terrible Car Analogy

Aston Martin DB9

?

470 BHP

=

470 BHP

0-100 km/h: 4.6 sec.

Top speed: 305 km/h

## Yet Another Terrible Car Analogy

Aston Martin DB9

**470 BHP**

0-100 km/h: 4.6 sec.

Top speed: 305 km/h

Cargo volume: 197 litres

Scania R124

**470 BHP**

0-100 km/h: ~30 mins.

Top speed: yawn...

Cargo volume: 1 MBL

# The Megahertz Myth

500 MHz

≠

500 MHz

- Instruction set (CISC vs. RISC)
- Power consumption vs. scale
- Memory bandwidth / cache
- Internal structure and buses

# The Megahertz Myth

Pandora

500 MHz

Caanoo

500 MHz

≠

- ~~Instruction set (CISC vs. RISC)~~
- Power consumption vs. scale
- Memory bandwidth / cache
- ~~Internal structure and buses~~

# Software

# Software

# Operating System

# Software

# Emulators

GINGE

# Software

# Emulators

## Open Source

- Anything for Linux (performance allowing)
- Some porting required

## Homebrew

- Not always open source
- Author often ports to new devices

## Commercial

- FunGP (GPH)
- Pandora App Store

**SuperTux (Pandora, GPL)**

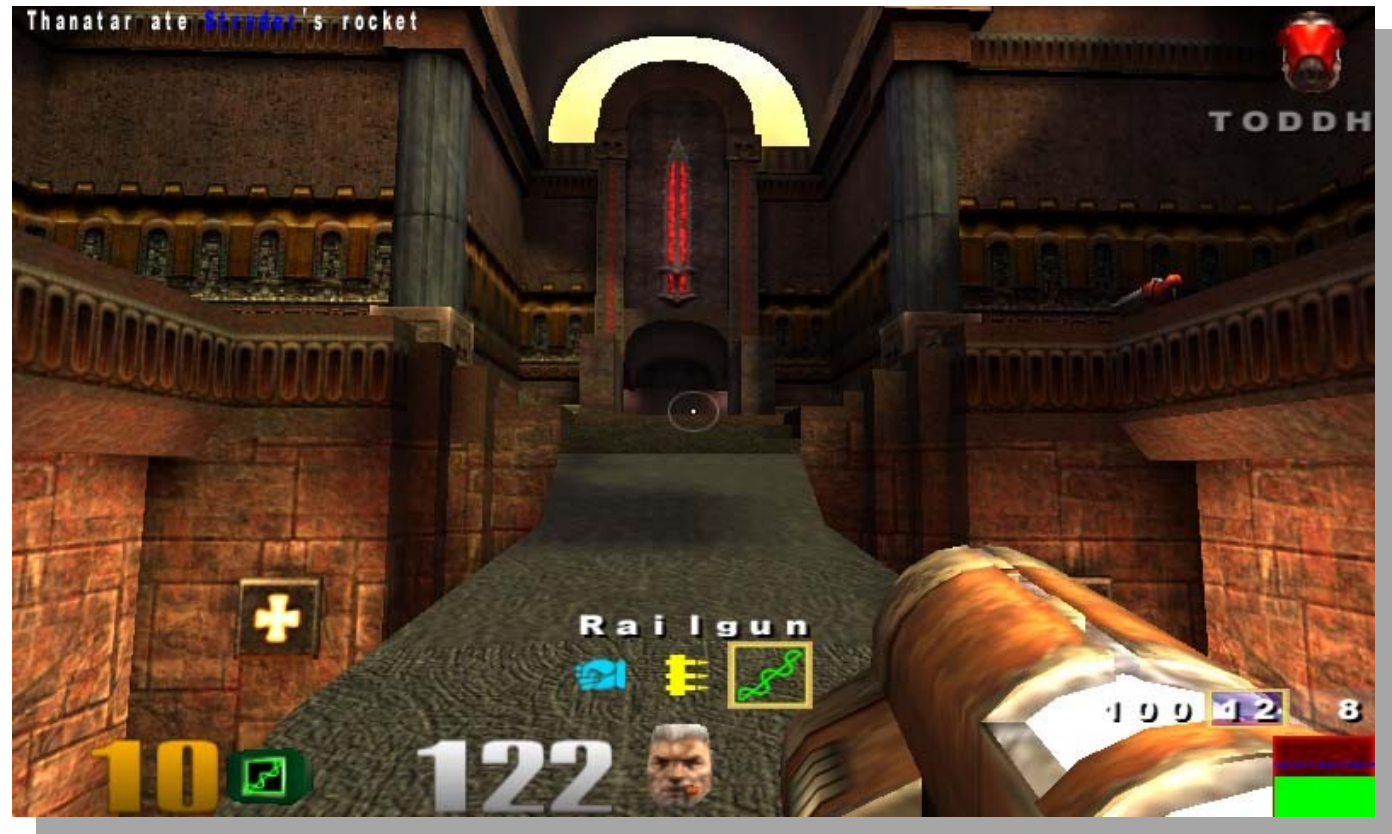

**Cave Story (GP2X, GINGE)**

## Monkey Island Series (ScummVM)

Quake 3 (Pandora)

Redemption (Caano)

# Software

# Applications

## Multimedia

Audio

Audacious  
Deadbeef  
Exaile  
Ommpc

Built-in player

Video

MPlayer (X)  
VLC

Built-in player  
MPlayer (SDL)

# Software

# Applications

## Internet

WWW

Aurora  
Chromium  
Firefox/Fennec  
Midori (OS)

CWB  
Links

Mail

Claws

?

## Productivity

Office

Abiword  
Gnumeric  
OpenOffice

Write

Graphics

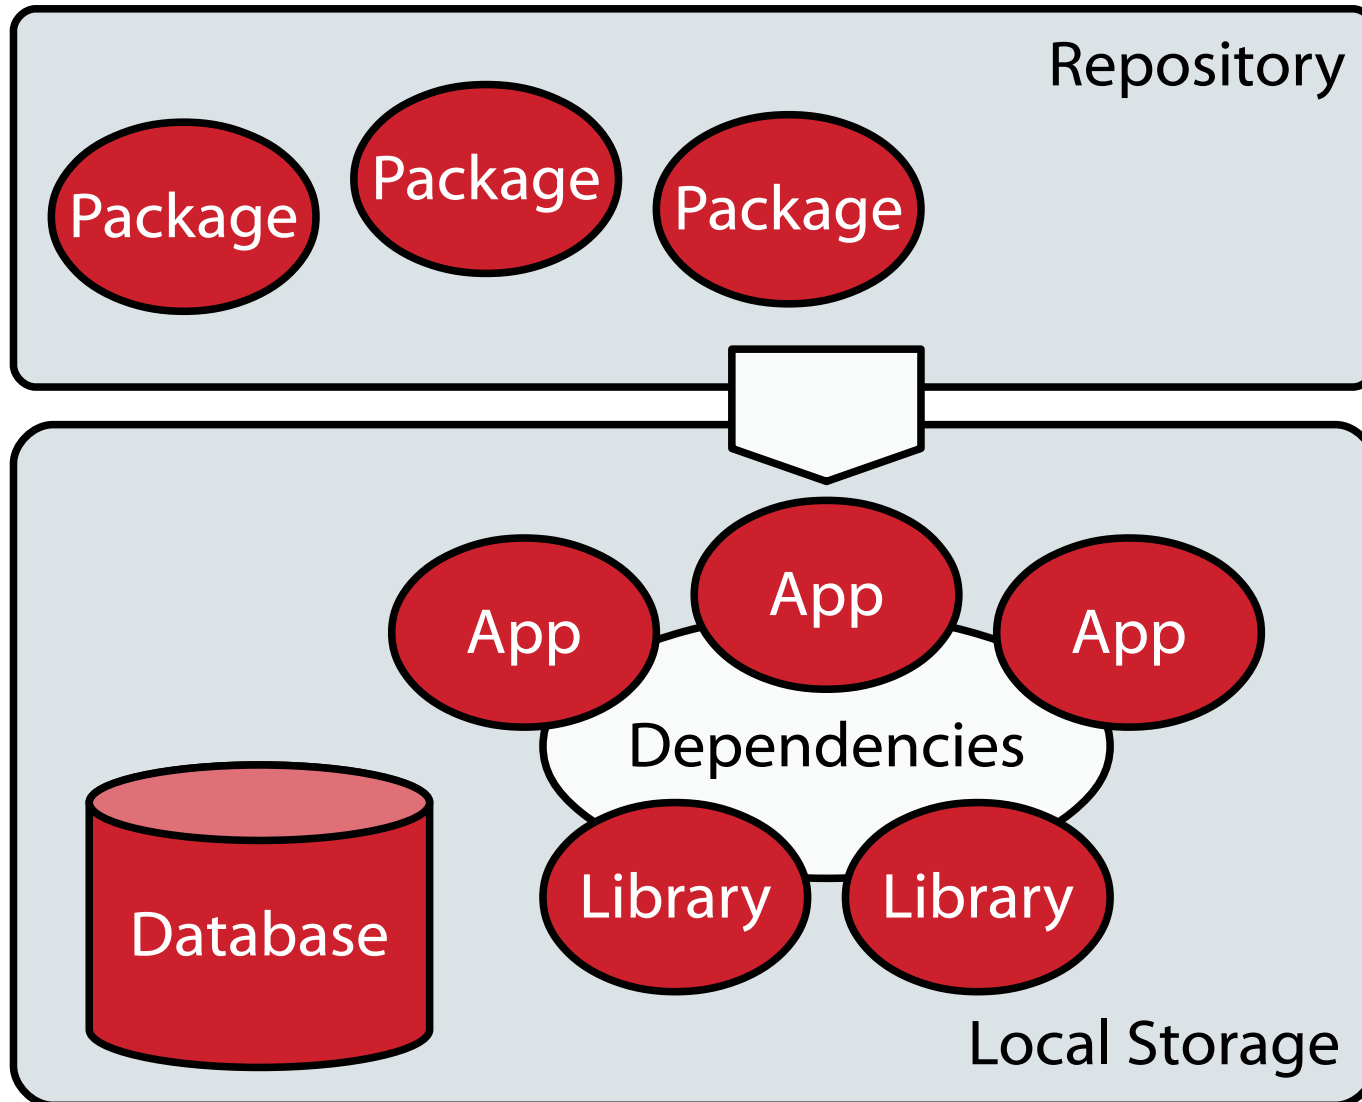

GIMP  
GRAFX2  
mtPaint

GRAFX2

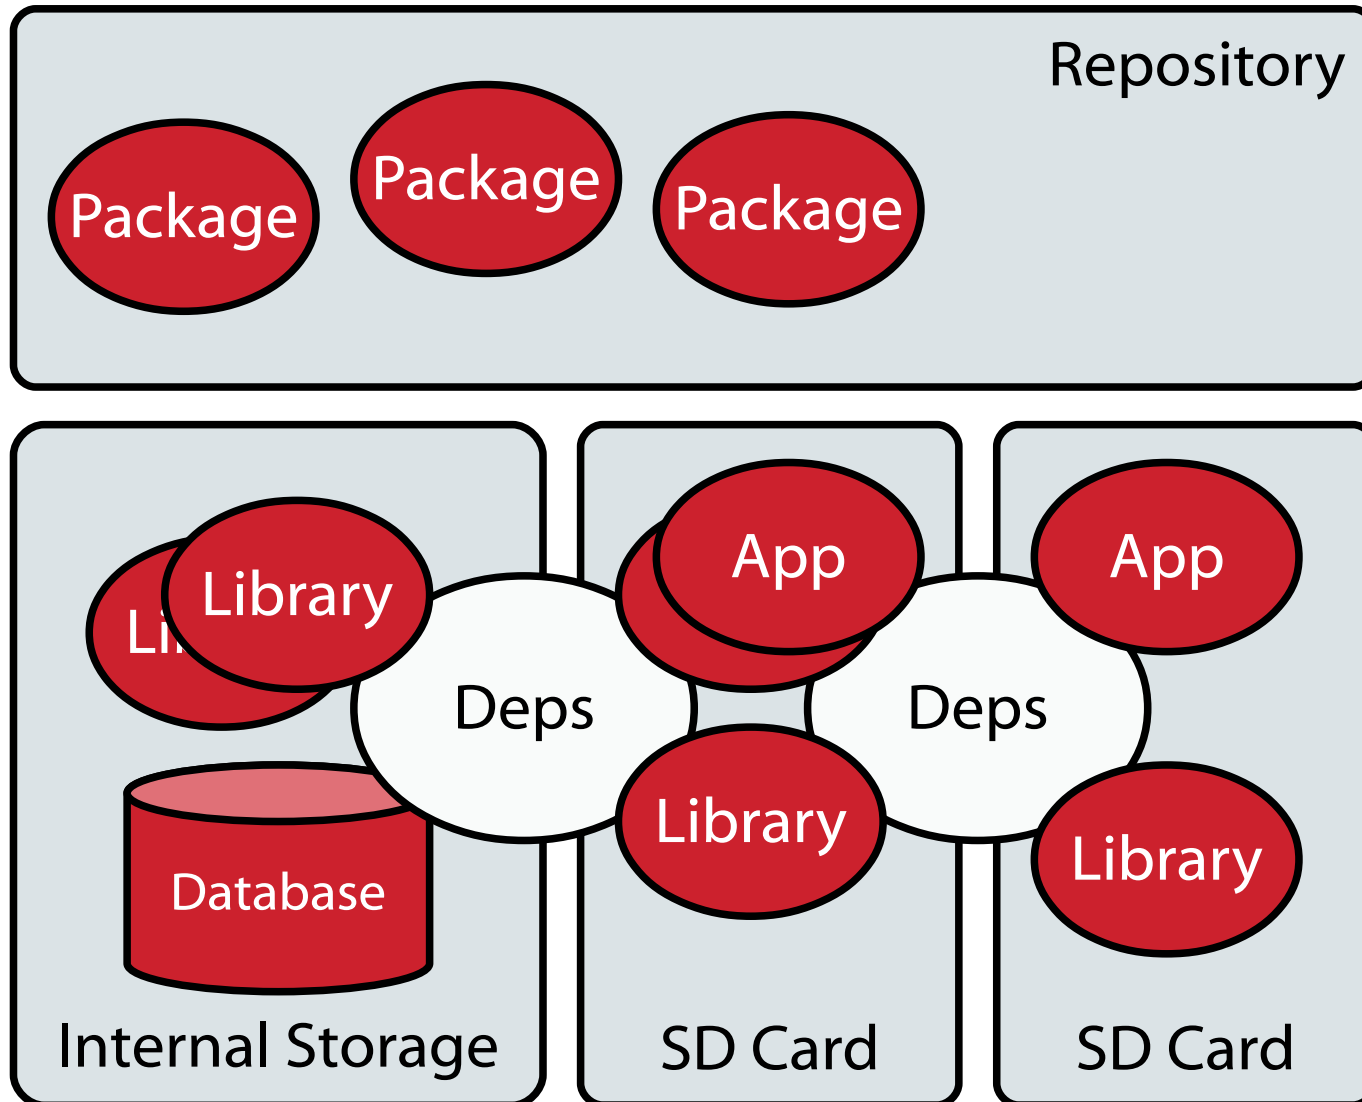

# Packaging

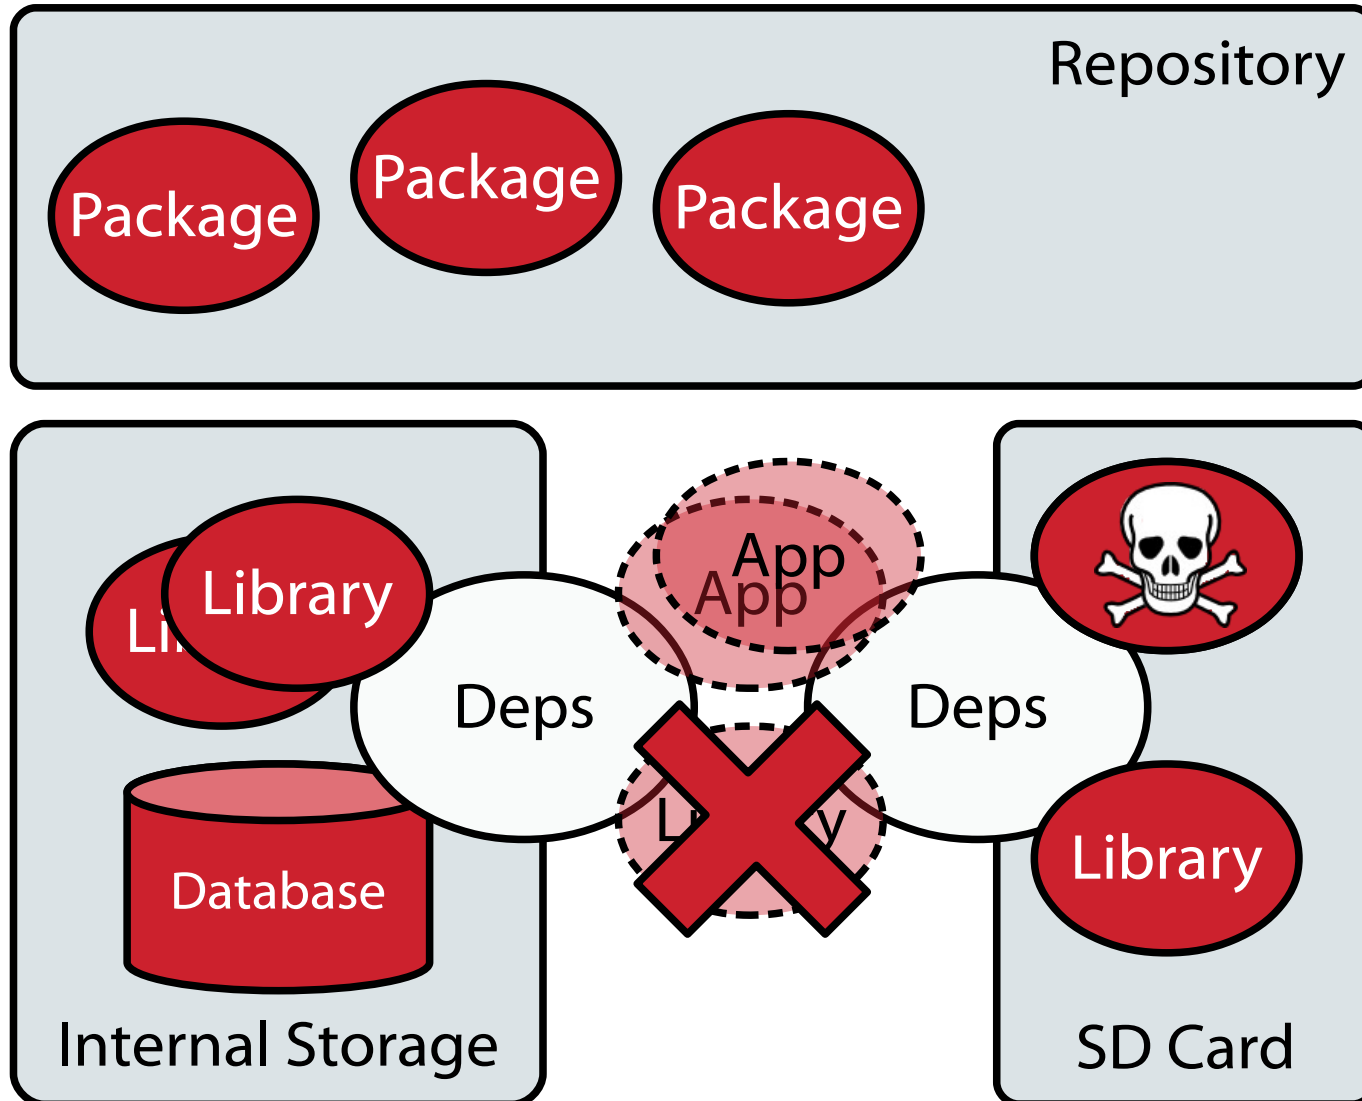

## Traditional (Linux) Package Management

## Package Management On Removable Media

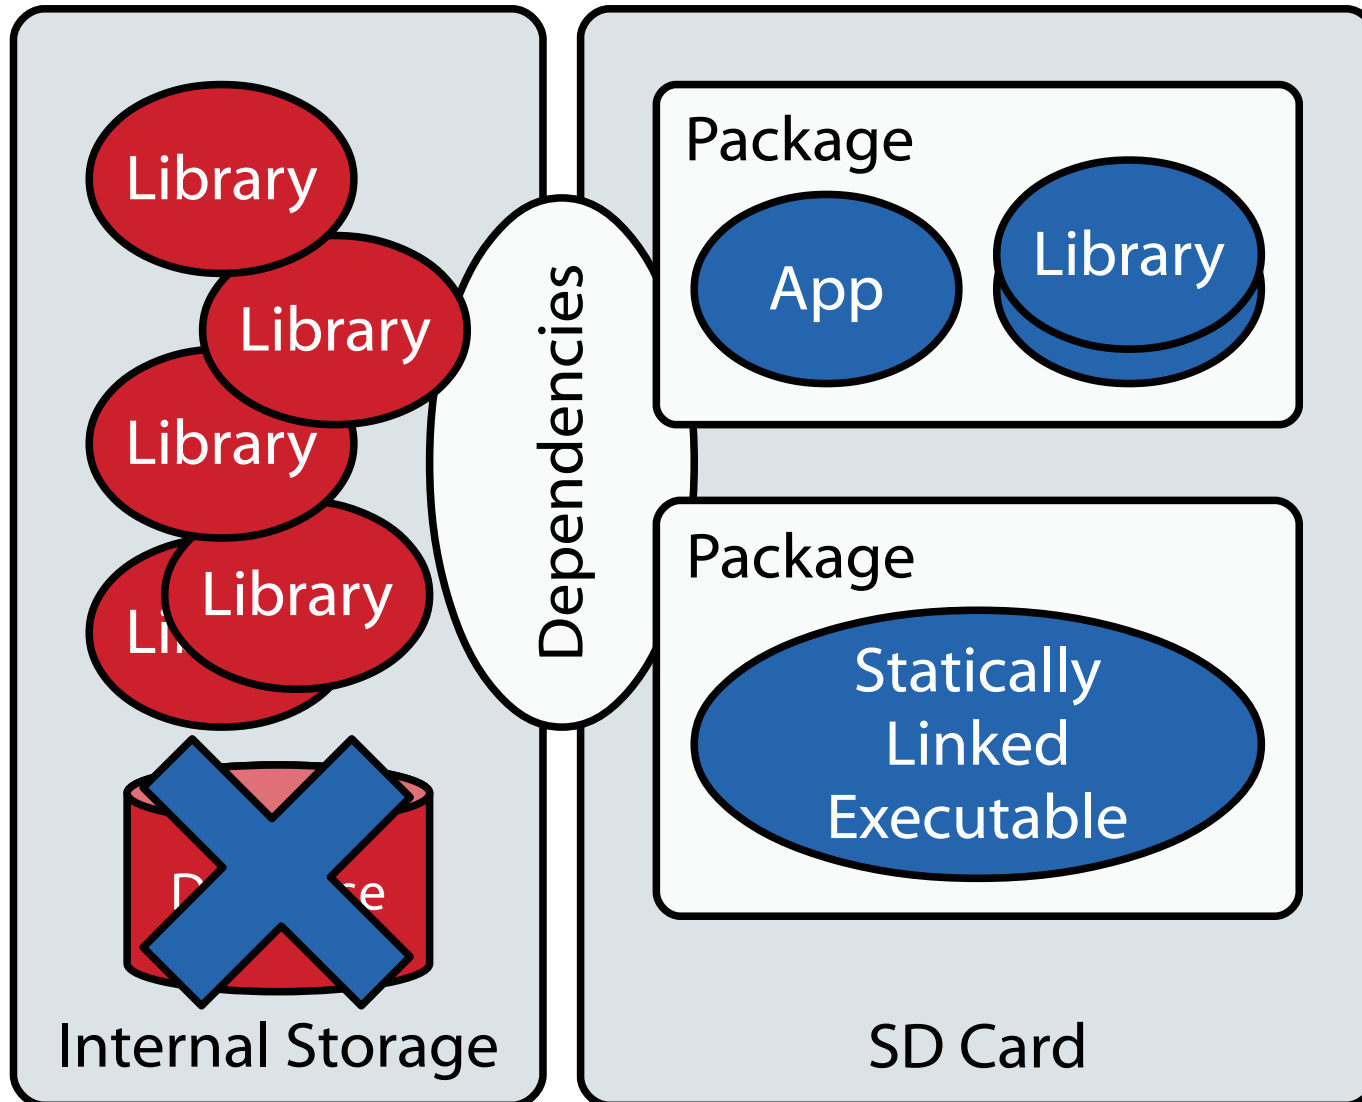

## Package Management On Removable Media

# Managing Dependencies On Removable Media

## Packaging

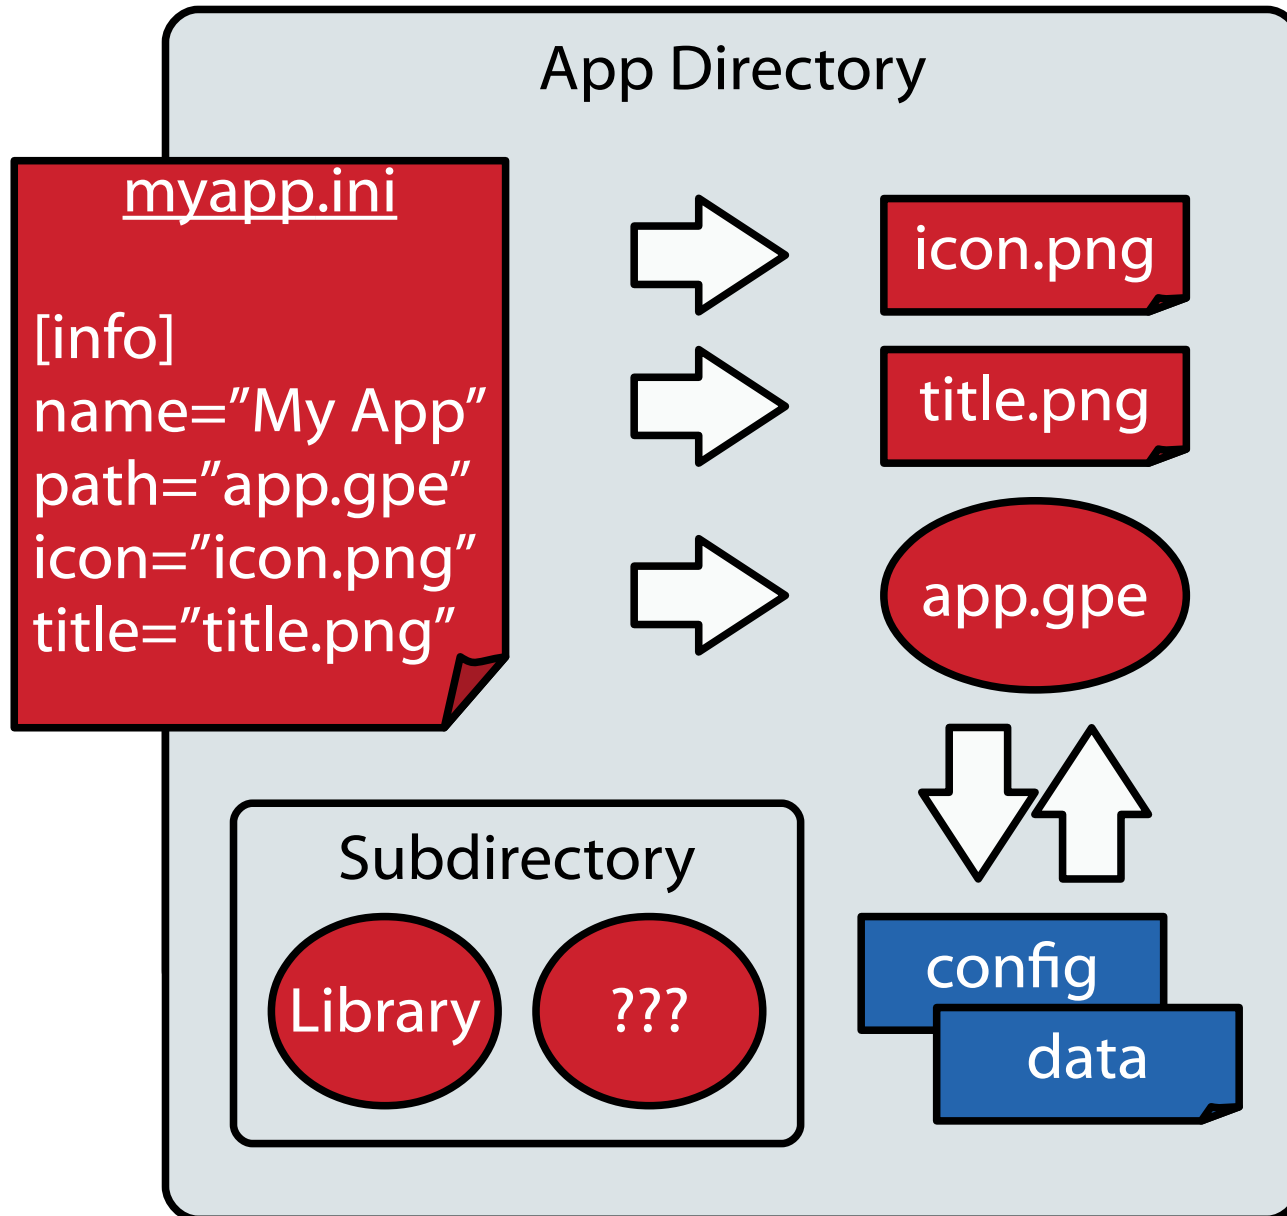

# GPH-Style Packages

Package Archive

e.g. ZIP or RAR

# GPH-Style Packages

# Packaging

## GPH-Style Packages

### Advantages

- Easy to make
- Easy to use
- Data stored with application

### Disadvantages

- User must extract (and have tools)
- Limited categories/functionality
- Easy to break/overwrite

# Pandora (PND) Packages

## Packaging

PND Package

.pnd extension

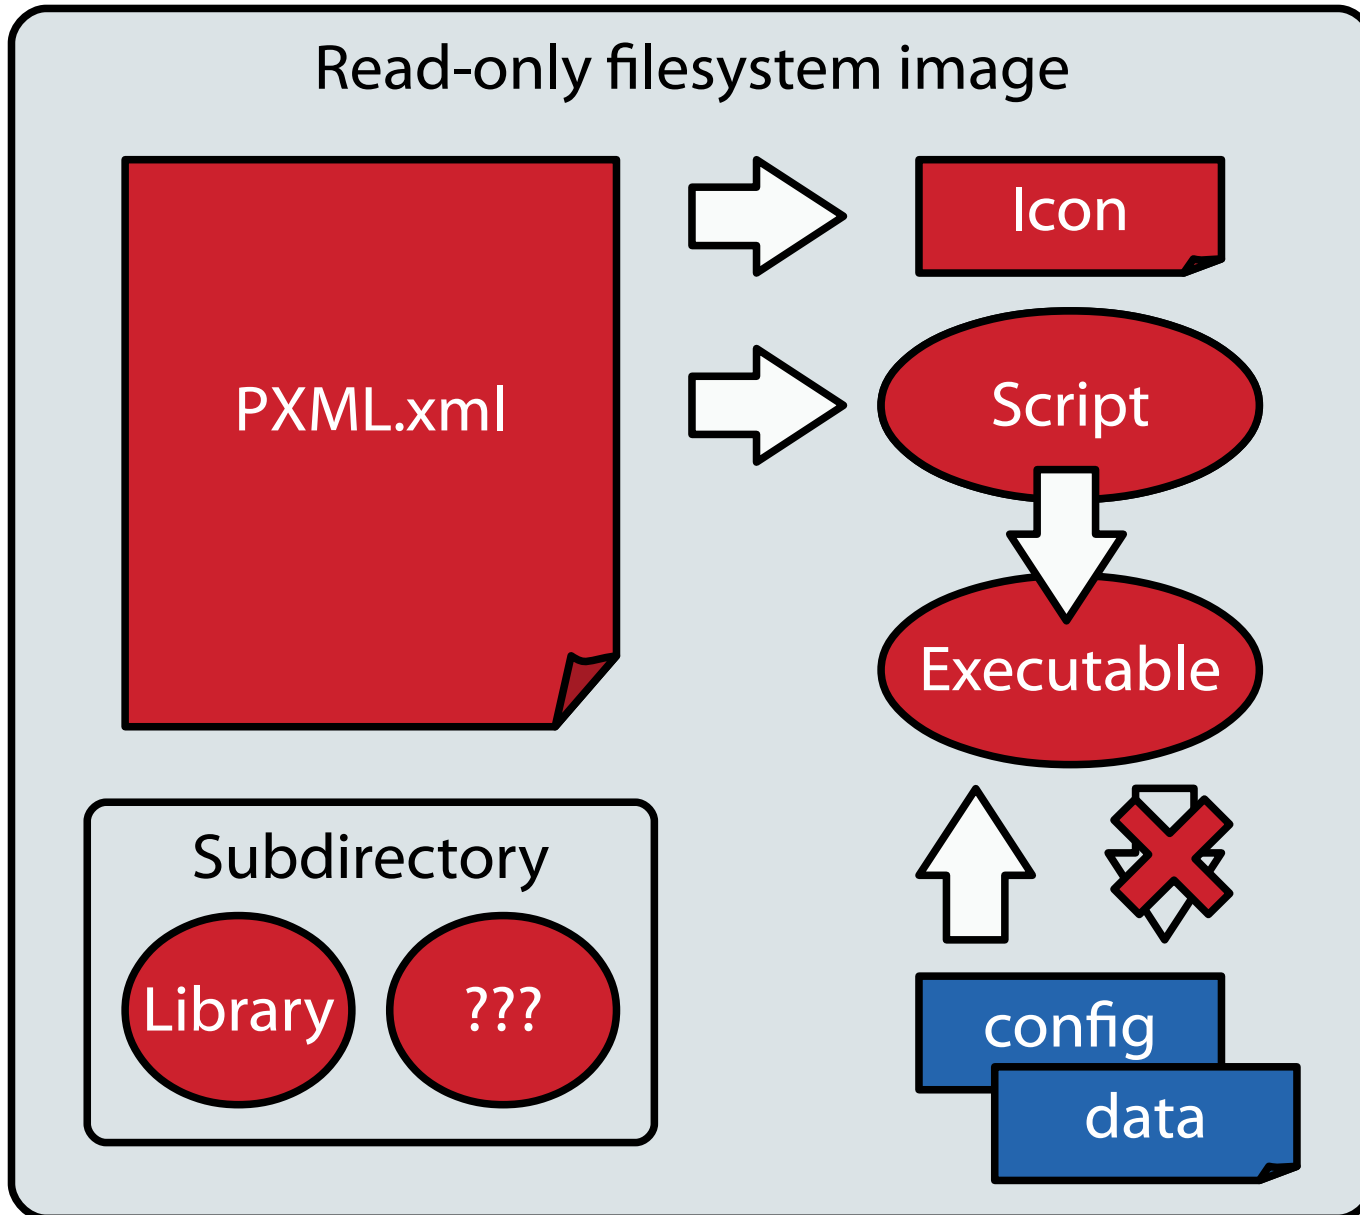

# Pandora (PND) Packages

## Packaging

Read-only filesystem image  ISO/SquashFS	PXML  XML file	Icon  PNG
------------------------------------------------------	----------------------	-----------------

# Pandora (PND) Packages

# Packaging

# Pandora (PND) Packages

## Packaging

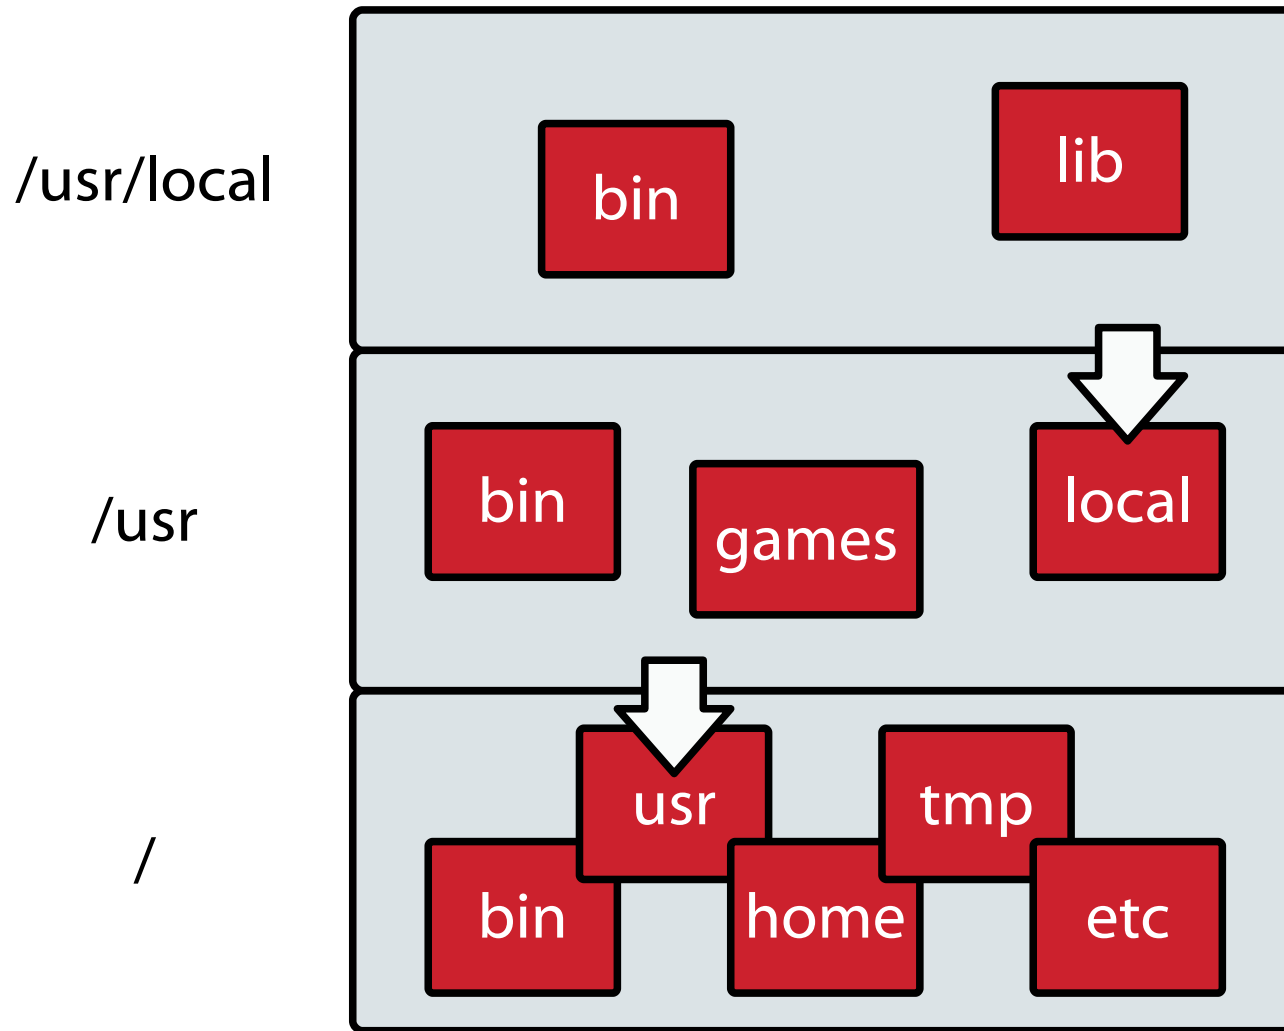

**Q: So where do I save my stuff?**

**A: To the current directory!**

## Union FS

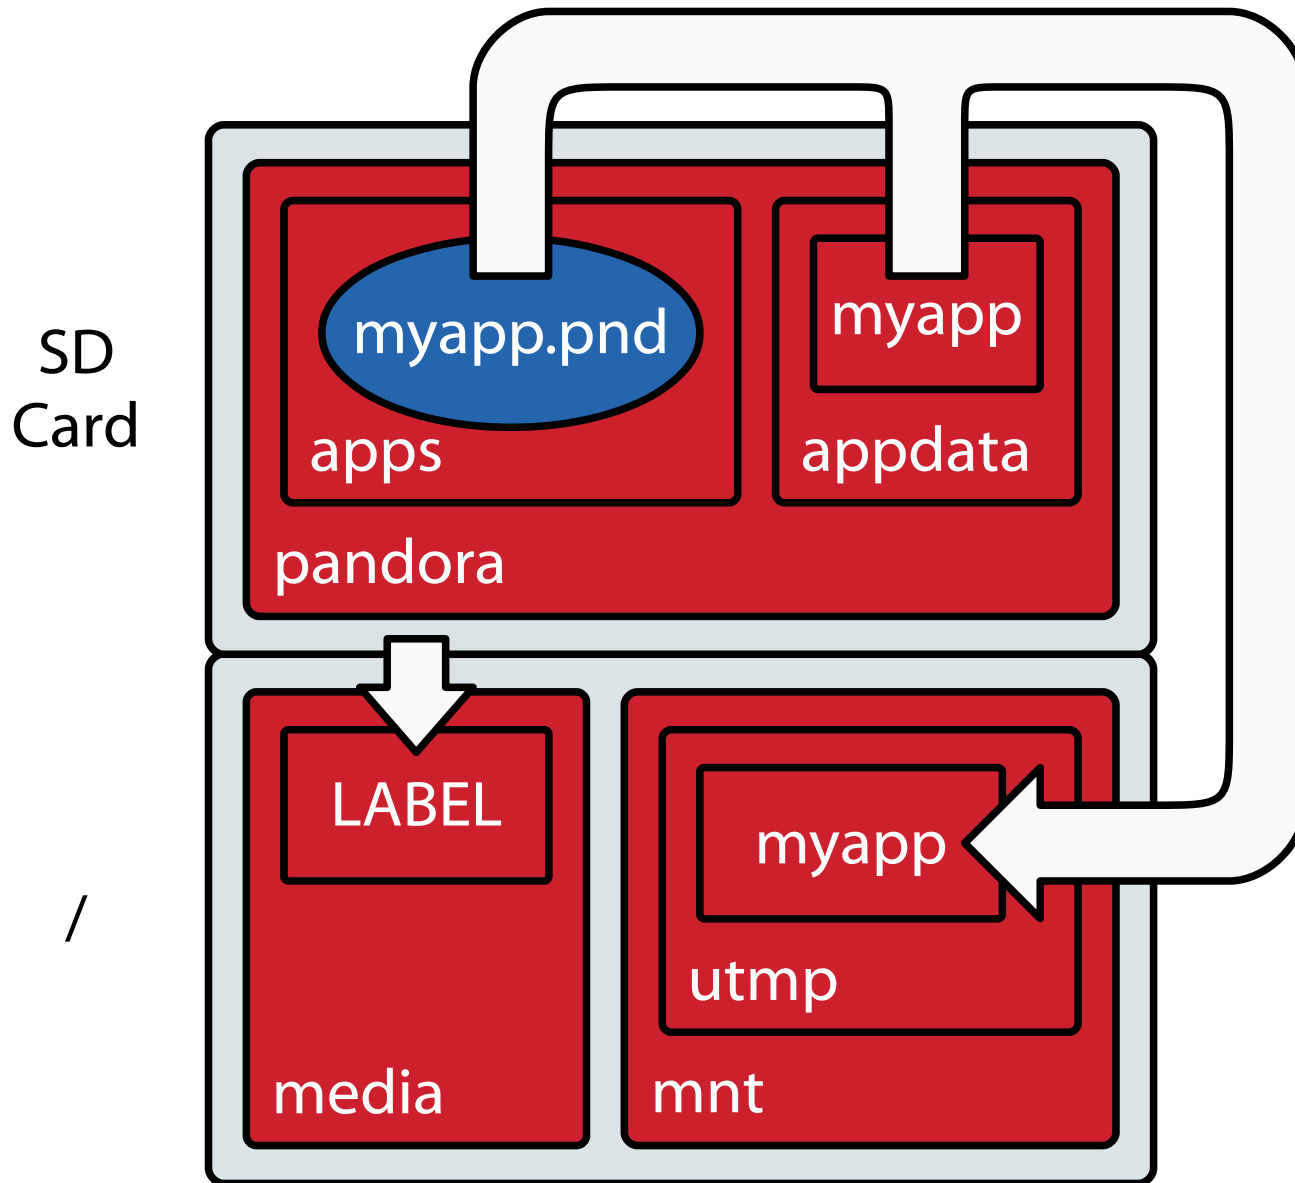

- + Allows filesystem mounting over an existing mount point
- + Transparent to application
- = Current directory appears writable from read only filesystem

# UNIX Mount Points

# PND Mount Points

# Packaging

# Pandora (PND) Packages

# Packaging

## Advantages

- Very easy to use
- No extraction required
- Application protected (read-only)
- Data stored centrally
- Advanced features (categories, documentation, versioning, etc.)

## Disadvantages

- More difficult to build than ZIP
- Caveats for writable files (e.g. config)

**Development**

- **C and C++**
- **Python (Pygame, distPND)**
- **Bennu, GLBasic, etc.**
- **Java**
- **ARM Assembly**

- **Based on GCC**
- **CodeSourcery**
- **GPH official SDK**
- **Community SDKs**

# Development

# More in the Workshop...

**The Future...**

# The Future...

## **OMAP4**

- Dual core Cortex-A9
- 1 – 1.5 GHz
- 2x 3D performance of OMAP3

## **Pandora 2?**

## **More Software!**

# iReadyGo/RG

- Android-based?
- 1GHz CPU
- 5" 800x480 OLED
- HDMI

**More Info**

**Questions?**

**Thanks!**

Looks like your presentation  
is finished.

How about a beer?

**Yes**
